\*Rollover sample # to see lab name and ID and METHOD  
 \*MG/L=milligrams of contaminant per liter of water, equivalent to ppm (parts per million).  
 \*ug/L=micrograms of contaminant per liter of water, equivalent to ppb (parts per billion).  
 pCi/L=picocuries of contaminant per liter of water--a curie is a measurement of the rate at which a radioactive material decays.  
 "<" (less than) means the contaminant cannot be accurately detected below the limit specified; the result can be considered zero.

Software version number 7.3.17 (11-20-2020)
